RE: Orion Construction

Patrick:

BDS Architects has had the pleasure of working with Orion Construction Inc since 2014. The First project was a University of Alaska Fairbanks project. Since then, Orion and BDS Architects have successfully accomplished multiple projects for Local, State and Federal Government Agencies as well as Private clients throughout Alaska. Our experience has been that Orion is professional, collaborative, problem solving, and timely with attention to quality and safety.

BDS and Orion also collaborate well as a Design-Build team from the Program Managers to field personnel. The work is typically of excellent workmanship resulting in few punch list items. Orion demonstrates a strong ability to control costs and schedule on the projects they lead.

Sincerely,

Dan Seiser, AIA
BDS Architects, Inc.
